Programme for intensive training in Desuggestopedy: RE-CA-CO Method

According to the theory of Suggestology, both the process of desuggestion and the process of suggestion occur in a suggestopedic environment. In the process of desuggestion, a spontaneous liberation from the old fixed norms takes place, while the process of suggestion influences the increasing use of the reserve capabilities of the brain and psyche. In the newest development of Suggestopedia, the approach puts more emphasis on the processes of desuggestion. This new direction is reflected in the new name for the method - "The Desuggestopedy: Reserve Capacities Communicative Method (or RE-CA-CO Method)" and is already included in our courses for training teachers and other specialists.

Desuggestive pedagogy requires a firm knowledge of theory and a creative and flexible use of techniques. Communication has to be in accord with changes occurring in the participants' feelings and behavior. Individual training is necessary for good results.

It is, therefore, a pleasure to inform you of Prof. Dr. G. Lozanov's teacher-training courses and workshops for 1998. Language teacher training consists of two first-level courses and one second-level course. The training of teachers, physicians, psychologists, managers etc. in other subjects, aside from foreign languages as well as for teaching children is also available by special arrangement.

ACC: S.W.I.F.T: HYPV AT2B, BLZ 58000, KTO.NR: 20190438 113,
International Centre for Desuggestology, Vienna Austria.

FIRST LEVEL:

1st. stage:

Participation of teacher-trainee as a student in one of our foreign language courses (80 hours). During the second half of the course, the teacher-trainee will also participate in lectures and tutorials given by Dr. G. Lozanov.

2nd. stage:

Teaching of English by the teacher-trainee under the supervision of Dr. G. Lozanov. The duration of the course will be 80 academic hours. Additionally, some hours outside of the course, but concurrent with it, will be devoted to lectures and discussions.

SECOND LEVEL:

Teaching of English by the teacher-trainee to advanced students, under the supervision of Dr. G. Lozanov. The duration of the course will be 80 academic hours. The training of teachers for teaching children, or to become teacher-trainers, is to be conducted by special arrangement after completion of the second level training.

To facilitate the training of the teacher-trainees who meet the following qualifications, the price, and the duration of training may be adjusted according to particular circumstances:

1. those who took part in Dr. Gateva's Italian course
2. those who participated in our longer seminars, or most of our shorter ones
3. those who have an advanced degree and experience in an Suggestopedic method similar to our authentic method
4. for those who, according to our evaluation, have completed the first stage of the First Level with very good results, we have made the following changes, as well:
 - a) The second stage of the First Level will be 50 hours of training in two weeks by means of modeling the process of instruction. The price is reduced to one half of the general fee.
 - b) The second level is 25 hours in one week by modeling the process of instruction. The price is reduced to one quarter of the general fee.

Remarks:

1. A certificate is issued only after the completion of the Second Level of training.
2. Training can also be undertaken in accordance with a prearranged time-payment schedule, or installment plan.
3. We recommend that the training of a trainer be carried out at the actual place where the teachers works, in order to help him or her additionally according to specific conditions.
4. Teachers, certified and personally trained by us, have the right to receive consultations free of charge about the difficulties which they may run into their work.

In addition to these activities, we propose one more possibility:

Many teachers and schools are using Suggestopedic-like methods without being directly trained by us. In such cases, we would like to propose that Dr. Lozanov be invited to the school to get acquainted with the work and to give consultations to enable these teachers to achieve the results which Suggestopedia is able to give when used correctly.

Trainer \$ 15.000,- + costs
